
JGEX, is a highly interactive Java application that will allow you to create proofs or sketches of geometry by hand, or solve geometry problems by computer with an automated theorem prover. JGEX will be capable of doing the following:

- Problem Solving
- Draw Proofs
- Create Solved Geometry Models
- Visual Dynamic presentation of proofs.
- Dynamic geometry software
- Geometry Theorem Prover (GTP)
- Automatic Generation of Solved Geometry Models
- Conceptual Geometry
- Geometry Applications

Currently JGEX is being developed into three parts, JGEX core, DGS and GTP. If you are interested in these capabilities you should download this link and visit JGEX webpage: All the contents are automatically generated from JGEX source code, so all the screenshots and information are automatically updated by JGEX. JGEX with JDK 1.4.2.1 (01/19/2003) on Windows 2000 or Windows 2003 Logo JGEX 1-2 of 2

Disclaimers JGEX is free and was developed from the source code released by the University of Southampton. However, the code is not a part of the JGEX project and we do not plan to ever release it under a GPL license. Please also note that we have not announced any technical problems, and our programmers are on top of it. If you find a problem and want to work with us to solve it, please mail: [jgex at java.net](mailto:jgex@java.net) Technical Information The JDK version used for this release is JDK 1.4.2.1 on Windows 2000 and JDK 1.4.2 on Windows 2003. The system is based on Java SE version 1.4.2. JGEX was written by Dr. Peter Pixeld using J2ME 1.0 SDK version 1.2 and is released under GNU Lesser General Public License. You may have noticed there is no documentation available for JGEX. This is due to the fact that there is not much to say. If you have any questions or suggestions please contact us at [jgex at java.net](mailto:jgex@java.net) or write us a mail. If you like 70238732e0
