
XPlane11Downloadserialnumber ##TOP##

[Download](#)

Launch X-Plane 11 and start flying the plane. An activation window will appear asking you to enter your serial number. After you enter it, another window will appear where you will be asked if you want to access features that are not available to the pilot of the aircraft. If you want to do this, then click the Yes button. After that, you will be able to use these functions - but only in simulator mode. If you don't want to do this, click the No button and you can continue playing X-Plane 11 as usual. Once everything is ready, click the Start button. And now you're on a plane.
